Water and Environmental Systems (CADSWES)

UNIVERSITY OF COLORADO **BOULDER**

Integration of RiverWare into CWMS

Presenters: David Neumann

2018 RiverWare User Group Meeting

February 1-2, 2018

Corp Water Management System

- Modeling Framework that integrates USACE models together
- Operate the system across modeling applications
- Integration uses HEC-DSS to move data

Some Supported Models in CWMS

- HEC MFP – Precipitation forecast
- HEC HMS – Rainfall Runoff
- HEC Res Sim – Reservoir Modeling
-  RIVERWARE
- HEC RAS – Flood Inundation Analysis
- HEC FIA – Flood Impacts Analysis

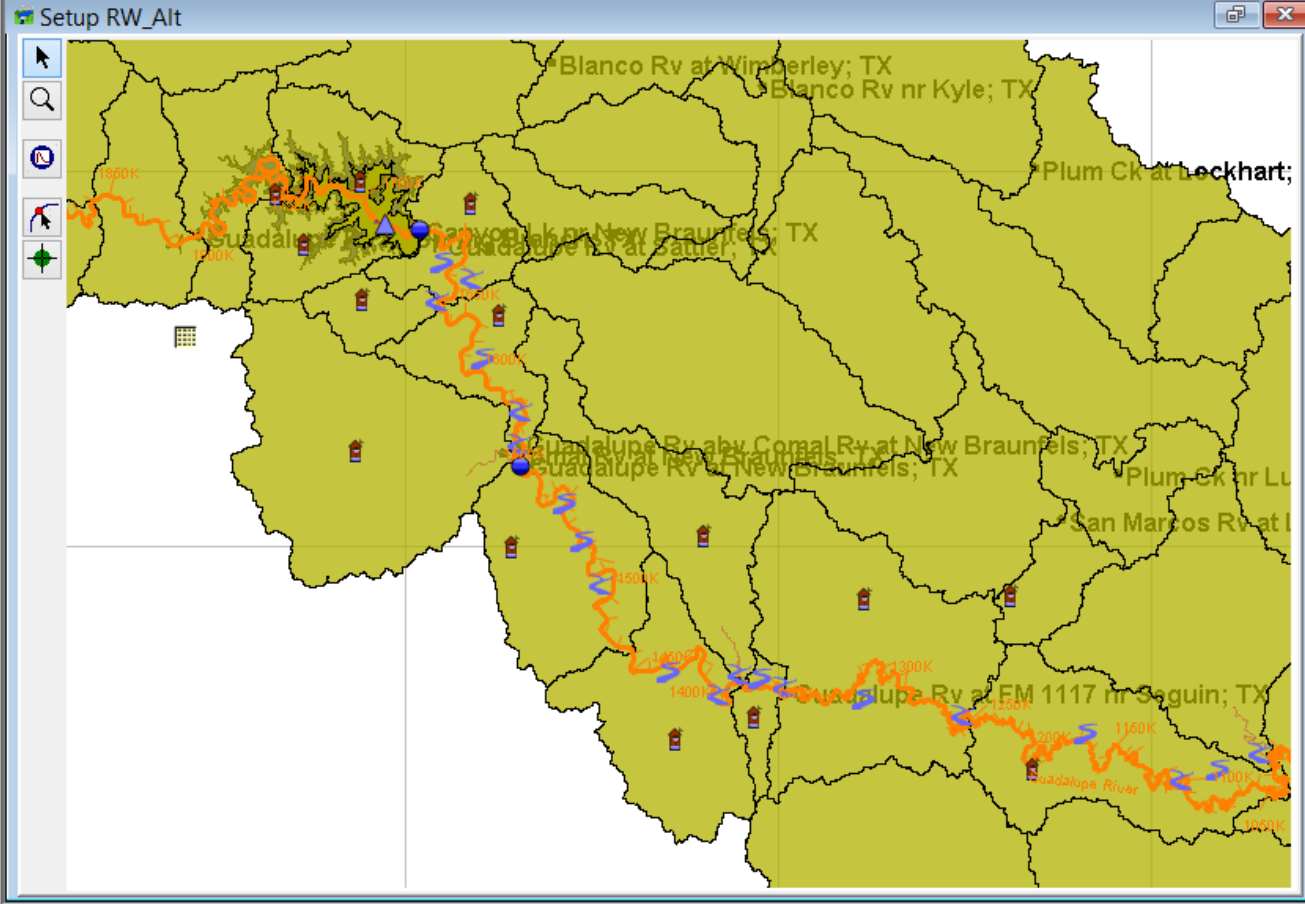

RiverWare Display Functionality

- Show RiverWare models in the CWMS framework
- Display objects in the maps and interface

guad1424 *

- Models
 - MetVue
 - MFP
 - HMS
 - ResSim
 - RiverWare
 - RAS
 - FIA
 - Supplemental
- Stream Alignments
 - Stream Alignment
- Forecast Runs
 - norains
 - rains
 - norains_RW

RiverWare Interface Opens

- SCT
- RPL Sets
- Plots
- Objects
- Workspace
- Diagnostics

CWMS “Compute”

- Each model is run in sequential order
- Data is automatically loaded
 - Input data from previous model
 - Output data sent to the next model
- All models use HEC-DSS for data transfer
- RiverWare uses Database DMIs

Upcoming work

- Investigate ways to aggregate / disaggregate data to different time scales
 - HMS models = 1hr
 - RiverWare = 1day
 - RAS = 1hr or 6hr
- CWMS Version compatibility: CWMS 3.1 will require DSS 7
